

OPERATION- HELMET.ORG

provides helmet upgrade kits to our military forces deployed or deploying to Afghanistan or other dangerous locales. This is at no cost to the Soldier, Sailor, Airman or Marine.

- **More Stable**
- **More Comfortable**
- **More Protection**
- **More Durable**

The helmet upgrade kit is a stable, pain-free, safer, waterproof, self-wicking, positively buoyant, air permeable, reduces sound reverberation and is installed without any helmet shell modifications. For all helmets, it includes seven highly engineered pads that replace the web suspension liner. Helmet shock transmission is reduced dramatically. Top impact was reduced from 219G's to 72G's and side impact from 160's to 87G's.

We depend on your generous tax deductible donations.

Over 63,000 kits have been sent to date.
